

B.C.'s Energy College™

NLC is committed to providing a safe campus environment.

In case of a serious safety issue, there will be an audible **Alertus** alarm and a notice will also appear on campus workstations. **NLC strongly recommends that you add this application to your mobile device as an additional layer of notification in the event of a serious situation on campus.**

This is the first of several handy applications for mobile phones that NLC will be making available.

Alertus

Mobile app to access Northern Lights College's Alertus system

Alertus is Northern Lights College's alert and emergency notification system that uses audible and visual alerts to warn the college community in the event of a lockdown situation. It uses push notifications so it will not drain your battery.

Once installed, the code to activate this app is: 6521

The Alertus Activator App allows authorized dispatchers to quickly send emergency notification alerts to faculty, staff, students, or personnel via Android or IOS tablets or smart phones.

Alertus for iOS or android  
is available for download at nlc.bc.ca/apps
