

As a Program Advisor, I take a student-first approach to Education Council. I'm there to ask the right questions and share the real-life insights I get from advising students every day. I see myself as a bridge between us on the front lines and administration. By using my understanding of academic programs, courses, and policies, I advocate for the clarity we need, so we can spend less time on the fine print and more time helping our students.

Thank you for the nomination. I feel a program advisor's input on Education Council is a great addition for the College.

If you agree, vote for me 😊
