

Good morning,

My name is Kunal Attri, and I am a returning Northern Lights College student currently completing my Business Management Certificate. I previously completed my Associate of Science degree at NLC, so being involved with the college again is especially meaningful to me. I am currently working as a Shift Manager at a casino in Fort St. John, where I have developed experience in leadership, financial responsibility, decision-making, and working with people from different backgrounds. I have also been involved in the Fort St. John community for several years through work and other community activities.

I am interested in serving on the Board of Governors and Education Council because I would like to contribute to the college beyond my studies and represent the perspective of students. Having been both a previous and current NLC student, I understand some of the challenges and opportunities students experience. I believe my work experience, leadership skills, and familiarity with the Fort St. John community would allow me to bring a practical and student-focused perspective to these roles. I am returning to NLC to further my education and progress in my career, and I would like to give back to the college while doing so.
